

What is Conservatorship

A conservatorship is designed to offer protection over an individual's finances and/or their property. You can have a Guardian and a Conservator, or the same person can act as both.

Full Conservatorship

A conservator may be appointed if an individual only needs help with financial matters - but will cover all things related to finances, like savings and assets.

Limited Conservatorship

A limited conservatorship is when an individual only needs help in managing certain aspects of their finances but not all.

Here are a few decisions a conservator **could** make for you:

- **Determine your monthly budget**
- **Decide where your savings go**
- **Choose where you can live**
- **Select what you buy**

To determine if a Conservatorship is right for you:

- **Begin by reviewing your life goals or Person Centered Plan**
- **Determine areas you need support**
- **Decide how much support you need**

If a conservatorship is the right choice for you, start by:

- **Contact Local County Clerks office for filing assistance/information**
- **Understand fees and reporting obligations**
- **Complete evaluations**
